5. Plans

- a. A staff study was prepared in I/DM, in coordination with OSI, regarding the need for expansion of the guided missile effort in both offices. The Study has resulted also in clarifying the delineation of responsibilities of the two offices in this field.
- b. Branches are undertaking review of their FBD requirements to insure their adequacy, with particular consideration of subjects which have or may be contracted to external translating services.
- c. Recommendations toward Terms of Reference for NIE 11-4-58 are in preparation in I/NE and should be completed in February.
- d. At the suggestion of Deputy Chief Economic, inquiries have been made by I/EE as to industrial orientation courses which may be available through US industrial facilities. Electronics Division, Dept. of Commerce, has supplied names of suggested contacts for possible inquiry on this subject, and OO/C has been asked to conduct further inquiry.
- e. I/EE plans undertaking research toward production of a report covering Trends in the Electronics Industry of Communist China.

6. Problems

Review of US Army Signal Intelligence Agency contributions to the Soviet Bloc NIS program continues to present problems. In the present instance, the contribution to NIS 14, Poland, Section 64, on Telecommunications Equipment was received late and is of unsatisfactory character. Attempts are being made to obtain its review and revision in the preparing agency, in collaboration with I/EE. Repetition of this situation causes delay and hampers production of Sections 64 of satisfactory quality. In event arrangements for improvement cannot be effected, recommendations toward a revision on the manner of production of this section may be submitted.

7. Recommendations
